

Rule Pockets and Claim Boundary

High-usefulness pockets are visible, but family-held-out generalization remains the limiting evidence for broad claims.

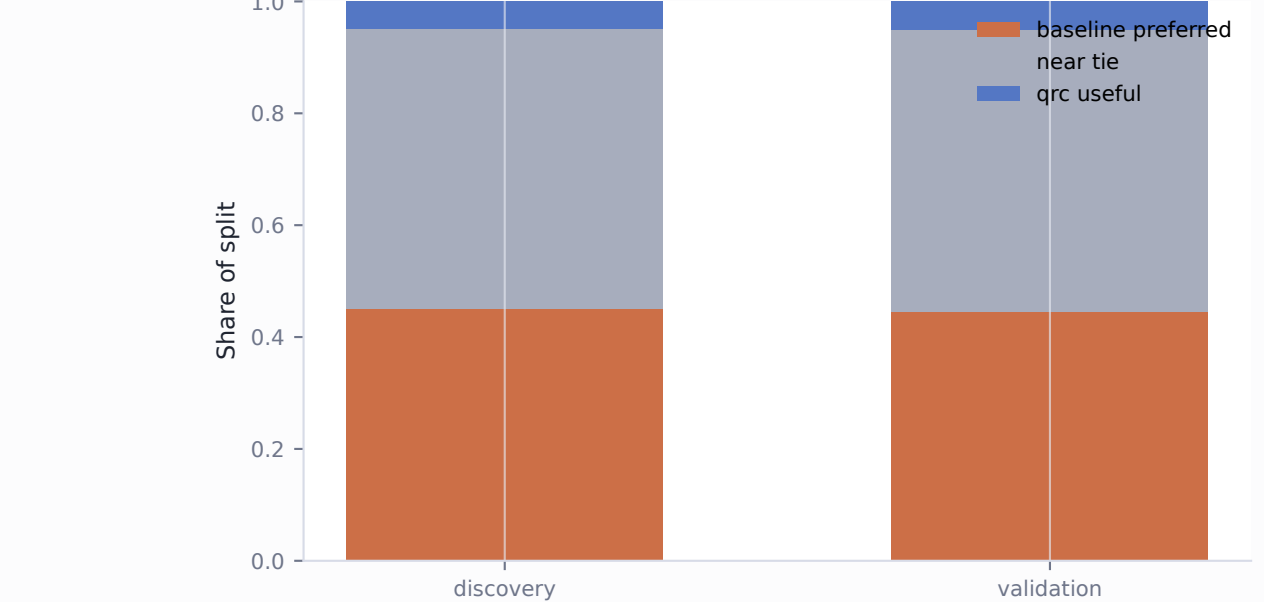

Validation rule pockets

Family distributions on validation

Discovery/validation outcome agreement

VALIDATION SIZE
5,000 labeled datasets from the frozen target-free selection.

AVERAGE RESULT
mean advantage -0.160; median -0.030.

SELECTIVE RESULT
955 any wins; 258 useful wins at +0.05.

BASE-GENERATOR HOLDOUT
AUC 0.763, R2 0.038.

FAMILY HOLDOUT
AUC 0.511, R2 -3.306.

CLAIM BOUNDARY
Dataset-property regime map, not broad average QRC superiority or fundamental quantum advantage.
