

# Rule Pockets and Claim Boundary

High-usefulness pockets are visible, but family-held-out generalization remains the limiting evidence for broad claims.

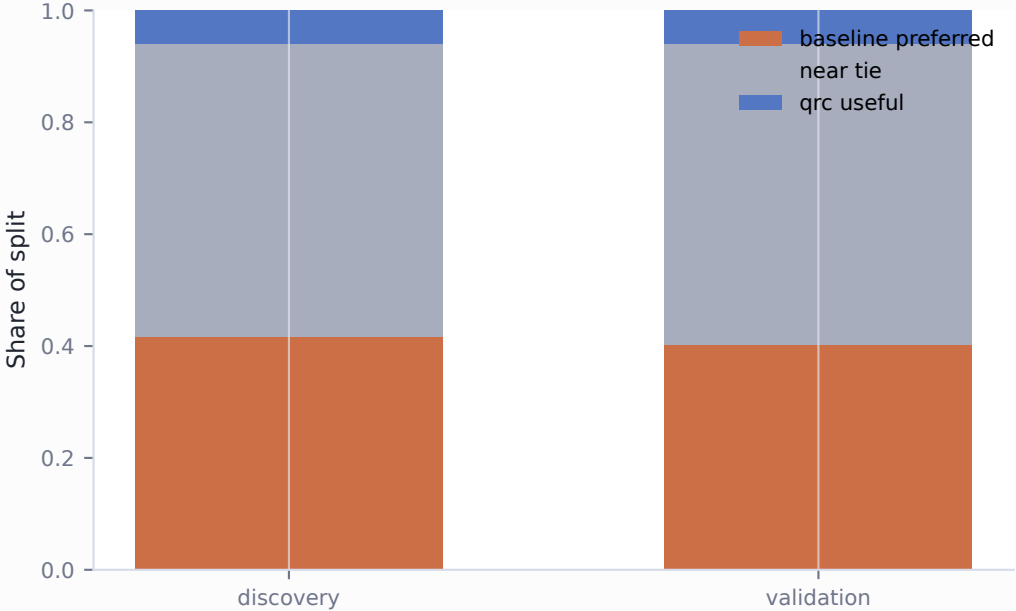

Validation rule pockets

Family distributions on validation

Discovery/validation outcome agreement

**VALIDATION SIZE**  
10,000 labeled datasets from the frozen target-free selection.

**AVERAGE RESULT**  
mean advantage -0.116; median -0.024.

**SELECTIVE RESULT**  
2,176 any wins; 601 useful wins at +0.05.

**BASE-GENERATOR HOLDOUT**  
AUC 0.746, R2 0.105.

**FAMILY HOLDOUT**  
AUC 0.635, R2 -0.420.

**CLAIM BOUNDARY**  
Dataset-property regime map, not broad average QRC superiority or fundamental quantum advantage.
